INTEGRATED TELEPHONE SYSTEM

KX-T2371 *Advanced* **ITS**

Outstanding Features with Built-In Quality

Data Port *Data Port*

A second jack on the back of the phone allows you to connect a computer, modem, fax machine, answering machine or other single line device.

13-Station One-Touch/Speed Dialer

10 one-touch dialing buttons are ideal for storing emergency or frequently-dialed numbers. You can also store and retrieve 3 phone numbers for 2-step speed dialing.

One-Touch Redial

This function dials the number that you most recently used. If the line's busy when you call, just press the redial button to call back – it's fast and easy.

Timed Flash

This function, which is necessary for Call Waiting and PBX (switchboard) use, makes sure that you won't accidentally cut the line while a call is on hold.

Switchable Tone/Pulse Settings

You can change between tone (pushbutton) and pulse (rotary) dialing, even while dialing. This ensures that the KX-T2371 will work on both tone and pulse type phone lines.

Insertable Pause

This function lets you insert a dialing pause anywhere you want into a phone number to meet the dialing requirements of your PBX. It's a handy function for redialing.

Additional Features

- One-Touch Tone Switching
- Telephone Line-Powered Operation
- Ringer Indicator
- Wall Mountable
- Ringer Selector: Off/Low/ High
